¹This includes cases confirmed by diagnostic testing and presumptive cases. Presumptive cases are those without a positive diagnostic test who present COVID-19-like symptoms and had close contact with a confirmed case. County of residence for cases may change as new information becomes available. If changes occur, we will update our counts accordingly.

²For additional details on individuals who have died from COVID-19 in Oregon, please [refer to our press releases](#).

³This includes cases who test negative and are not epi-linked to a confirmed case.

COVID-19 hospitalizations

The number of hospitalized patients with COVID-19 across Oregon is 535, which is 12 fewer than yesterday. There are 125 COVID-19 patients in Intensive Care Unit (ICU) beds, which is six fewer than yesterday.

Yesterday's hospitalization data was inadvertently left out of the daily press release. Those numbers were 547 hospitalized patients with confirmed COVID-19 and 131 COVID-10 patients in ICU beds.

The total number of patients in hospital beds may fluctuate between report times. The numbers do not reflect admissions per day, nor the length of hospital stay. Staffing limitations are not captured in this data and may further limit bed capacity.
